

Weather Shield Loose Lick Supplements

Propharma's Weather Shield Loose Lick Supplements are a great way to provide *ad-lib* minerals and vitamins to cattle, sheep, horses and alpacas. Primarily containing essential salt and other vital minerals and vitamins, they replace the missing nutrients that are crucial to maintaining a healthy animal. The outcome of which is the animal will only take as much as they need according to its individual needs. This means that Weather Shield Loose Lick Supplements provide a very efficient and cost effective form of supplementation. Weather Shield Loose Lick Supplements are weatherproof and have been designed to be fed out in self draining troughs, making it ideal for open grazing situations. They can be used all year round.

Propharma has designed a Weather Shield product to provide a full range of vitamin and mineral requirements for:

- **Cattle** – For beef cows, replacement heifers.
- **Dairy** – For dairy cows, replacement heifers.
- **Sheep** – For grazing and feedlot sheep. It contains NO ADDED COPPER.
- **Dry Cow** – For cows prior to calving to supply available magnesium and phosphorus with minimal calcium content. Reduces the incidences of Grass Tetany and Milk Fever.
- **Horse** – For horses and ponies.
- **Alpacas** – For alpacas and llamas.

Weather Shield Loose Lick Supplements can also be used as a convenient and effective means of managing some of the challenges associated with the condition known as "Ryegrass Staggers", or more accurately as Perennial Ryegrass Toxicosis (PRGT). This is achieved by including a toxin binder that counters the endophyte toxins within the affected fodder. Stock can safely consume the same fodder without experiencing PRGT symptoms.

Weather Shield Loose Lick Supplements contain;

Macro Minerals = Calcium, Phosphorus, Magnesium, Salt and Sulphur

Micro Minerals = Cobalt, Copper, Iodine, Manganese, Selenium and Zinc

Vitamins = Vitamins A, D and E

Propharma Australia are manufacturers of high quality vitamin/mineral premixes and suppliers of nutritional additives and supplements for livestock. Buy direct from the manufacturer and save.
